Journal of Cellular Plastics

Subject and Title Index *Vol. 16/1980*

ABS structural foam, *p. 36*
Aging, rigid urethane foam, *p. 235*
Arm rests, *p. 47*
Automotive RIM, *p. 338*

Carbon monoxide, from cellular plastics, *p. 285*
Catalyst, characterization, *p. 27*
Catalysts, urethanes/isocyanurate, *p. 89*
Cellular plastics, *p. 83, p. 116, p. 212*
Combustibility considerations, urethane foams, *p. 230*
Compartment corner test, *p. 212*
Corner wall testing, *p. 83*

Elastomeric urethanes, *p. 331*
Epoxy, *p. 32*
Epoxy foams, *p. 223*

Fire hazards, *p. 212*
Fire modeling, *p. 212*
Fire research, *p. 212*
Fire test apparatus, *p. 83*
Fire testing, *p. 83*
Fire test method, *p. 83*
Fire, urethane sheathing, *p. 279*
Flammability, *p. 212*
Foams, *p. 32, p. 223*

Gear lever knobs, *p. 47*
Gel rise profile, *p. 27, p. 287*
Glass fiber reinforced foams, *p. 159*

Horn rings, *p. 47*

Isocyanate sheathing, residential, *p. 279*
Isocyanurate foams, *p. 141*

Low pressure molding, *p. 40*

Mexican urethane industry, *p. 141*
Microballoons, *p. 223*
Multiple nozzle machines, *p. 40*

Polyimide foams, *p. 223*
Polyols, from sorbitol, *p. 102*
Polyols, from tallow, *p. 102*
PVC Plastisol (foams), *p. 32*

Rigid urethane, Saran modified, *p. 171*
RIM, automotive, *p. 47*
RIM bumpers, *p. 273*
RIM, elastomeric urethanes, *p. 331*
RIM structural foam, *p. 36*
RIM trends, *p. 338*

Saran, combustibility modifier, *p. 171*
Small scale fire testing, *p. 212*
Sodium borohydride, *p. 32*
Sodium borohydride pneumatogen, *p. 32*
Structural foam machinery, *p. 40*
Syntactic foams, *p. 223, p. 326*

Thermal conductivity, *p. 116*
Thermal resistance test standard, *p. 116*

Urethane foams, animal fats, *p. 102*

Journal of Cellular Plastics

Author Index *Vol. 16/1980*

Artymyshyn, Bohdan
Urethane Foams from Animal Fats. XI. Urethane Polyols from Epoxidized Tallow, Sorbitol or Trimethylolpropane and Propylene Oxide; Preparation and Properties of Rigid Foams, *p. 102*

Bechara, I. S.
Unusual Catalysts for Flexible Urethane Foams, *p. 89*
Bilyk, Alexander
Urethane Foams from Animal Fats. XI. Urethane Polyols from Epoxidized Tallow, Sorbitol or Trimethylolpropane and Propylene Oxide; Preparation and Properties of Rigid Foams, *p. 102*
Brandreth, D. A.
Accelerated Aging of Rigid Polyurethane Foam, *p. 235*
Brown, Carol L.
Evaluation of Fire Response of Rigid Cellular Plastics Using a Small Corner Configuration, *p. 83*
Note: Recommendation for a New Standard Material for Determining Thermal Transmission Properties of Cellular Plastics, *p. 116*

Carroll, F. P.
Unusual Catalysts for Flexible Urethane Foams, *p. 89*
Chien, W. P.
Development of a Small Compartment Corner Test Method for the Preliminary Evaluation of Fire Performance of Cellular Plastics, *p. 212*
Clinton, John L.
Development of Lower Cost Polyurethane Modified Polyisocyanurate and Polyurethane Rigid Foams, *p. 152*
Conroy, Alan
Performance Evaluation of Isocyanate-Based Rigid Foam Used as Sheathing in Residential Wall Construction Exposed to an ASTM E-119 Type Fire Situation, *p. 279*
Ferrari, Richard J.
Automotive RIM Products: Trends and New Technology, *p. 338*
Gluck, David G.
Glass Fiber Reinforced Isocyanurate-Urethane Foams, *p. 159*
Hagan, Joseph R.
Glass Fiber Reinforced Isocyanurate-Urethane Foams, *p. 159*
Hilado, Carlos J.
Carbon Monoxide Evolution from Cellular Plastics, *p. 285*
Hipchen, Donald E.
Glass Fiber Reinforced Isocyanurate-Urethane Foams, *p. 159*
Hughes, Joseph M.
Development of Lower Cost Polyurethane Modified Polyisocyanurate and Polyurethane Rigid Foams, *p. 152*
Huttlinger, Patricia A.
Carbon Monoxide Evolution from Cellular Plastics, *p. 285*
Ingersoll, H. G.
Accelerated Aging of Rigid Polyurethane Foam, *p. 235*
Kenig, S.
Syntactic Foams I. Preparation, Structure and Properties, *p. 223*
Syntactic Foams II. Preparation and Characterization of Three-Phase Systems, *p. 326*
La Placa, Joseph P.
Xerox – Structural Foam Aesthetic Covers, *p. 36*

Zubillaga, Marta
Urethane Foams from Animal Fats. XI. Urethane Polyols from Epoxidized Tallow, Sorbitol or Trimethylolpropane and Propylene Oxide; Preparation and Properties of Rigid Foams, *p. 102*

CLASSIFIED ADVERTISING

TECHNICAL SERVICES SPECIALIST

Urethane Catalysis

Air Products & Chemicals, Inc., the leader in the development of catalysts for urethane products, seeks an exceptional individual with a proven track record to join our performance group at the Linwood, PA lab. The candidate must be results oriented, aggressive and imaginative, one who can bring advanced ideas and products to the marketplace. Strong technical written and verbal skills, ability to travel and work independently as a member of a multi-disciplinary team are essential. A degree in chemistry, materials science or engineering necessary. Successful urethane product development experience with market interaction and 2–5 years work experience are required. Expertise and achievement are more important than years of service. The right candidate will gain recognition and career growth in a company that rewards performance. We offer attractive salary and benefits including comprehensive relocation. Please send resume with salary history and requirements in confidence to:
